ESC's Austin 2022 TMAF Frequently Asked Questions for Speakers

We're glad you asked! Here's a few tips & tricks for creating a great presentation:

- Use a set template for presentations but avoid having every slide look the same
- Use images generously, but make sure that they support the text, rather than distract from it.
- A splash of color can brighten your slides if they're still readable on all displays (think high contrast).
- Use less text – limit yourself to only one concept or point per slide. A good rule of thumb is the '6x6 Rule' -- no more than 6 bullets per slide, and no more than 6 words per bullet.

10. Who is my contact at Energy Solutions Center if I have questions or concerns?
